Virtual Conference on

Solarisation of Pakistan

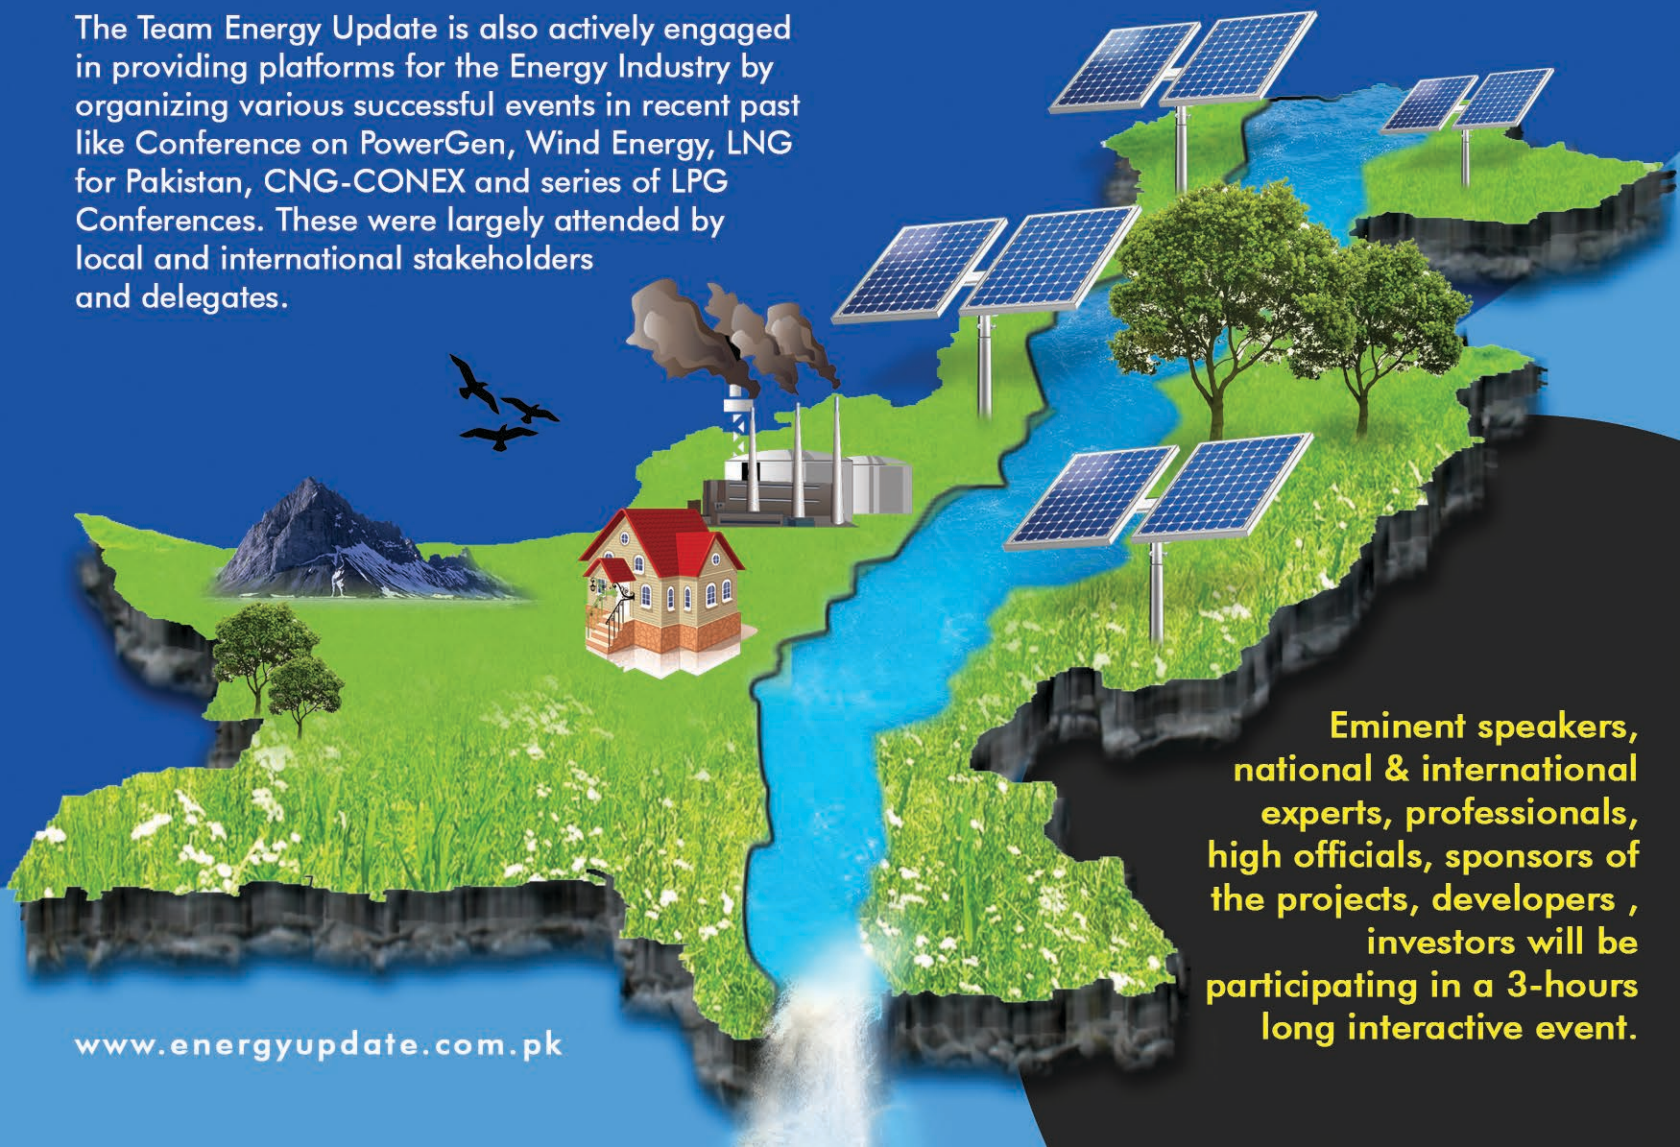

Reaping the benefits of Solar in Pakistan

Friday, October 02, 2020

Energy Update is a Pakistan's premier monthly magazine dedicated to the Energy Sector in Pakistan. The magazine has recently completed its successful journey of 14-years publications.

The Team Energy Update is also actively engaged in providing platforms for the Energy Industry by organizing various successful events in recent past like Conference on PowerGen, Wind Energy, LNG for Pakistan, CNG-CONEX and series of LPG Conferences. These were largely attended by local and international stakeholders and delegates.

Recently, the first-ever virtual session on Hydro Power Sector was received excellent responses and recommendations from the stakeholders in reaping the ARE Potential.

Eminent speakers, national & international experts, professionals, high officials, sponsors of the projects, developers, investors will be participating in a 3-hours long interactive event.

Solarisation of Pakistan

Reaping the benefits of Solar in Pakistan

Friday, October 02, 2020

Further in addition to hydro power, the AEDB is also pursuing 22 solar PV power projects of cumulative capacity of approximately 890.80 MW. Whereas, 430 MW capacity solar power projects are already in operational. Recently, the AEDB has also issued Tripartite Letter of Support (TLOS) to 100 MW Solar Project of Zhenfa Pakistan. This shows government commitments in boosting economical and clean energy in Pakistan. Moreover, it is estimated that Pakistan has the potential to generate 2.9 million megawatts of clean energy annually just from solar.

Therefore, Energy Update in Collaboration with Federation of Pakistan Chamber of Commerce and Industries is now organizing the first-ever Virtual Conference on "SOLARIZATION OF PAKISTAN" scheduled for Friday, October 02, 2020 (3-6pm).

The event will be focused on Theme: Reaping the benefits of Solar in Pakistan

The event will bring 200 participants, experts and stakeholders including; Federal and Provincial Governments Representatives, CEOs of Solar Energy System Providers, Regulators, Engineering and Consulting Firms and Academia.

Objectives of the Conference:

- To educate participants about latest developments in Solar and Hybrid Solutions
- To provide peer to peer learning opportunities about latest trends and technologies
- To take advantages from Government ease-doing business for finding investment and business opportunities within or allied industries
- To collaborate and network with stakeholders in contributing ARE Targets

Topics for Experts' Discussions:

- Mitigating Energy shortage and climate change challenges
- Solar Energy - Is this a preferred choice for end-user Consumers or Investors?
- Where Solar or Solar-Wind Hybrid share's will stand in energy pie vis-a-viz defined ARE Policy Targets for 2025-2030?
- Financing opportunities on 4KW to 50MW Solar Systems - why fails to attract customers?
- Provinces competitiveness in reaping the benefits of Solar from Int'l Funded Projects and provision given in article 157 of The Constitution of Pakistan
- Defining Roadmap for Solar Industry with ease-doing-business with best ROI
- Solar Energy Systems (On-grid/Off-grid), Battery Storages, Reliability and Sustainability.
