### Introduction:

Corporate Social Responsibility is a concept in which businesses consider the interests of society by taking responsibility for the impact that their activities have on customers, employees, shareholders, communities, and the environment. Businesses that are committed to CSR can improve their reputation, increase sales, reduce costs, improve employee morale, and attract and retain talent. CSR can also help to improve the lives of people in Pakistan and promote sustainable development. According to a study by the World Economic Forum, 82% of CEOs believe that CSR is important for their company's long-term success. The same study also found that 71% of consumers are willing to pay more for products and services from companies that they believe are socially responsible.

The National Forum for Environment and Health (NFEH) has been appreciating and recognizing socially responsible organizations each year through specific award criteria, questionnaires, and testimonials. NFEH is now pleased to announce the nomination of awards for the **16th Annual Corporate Social Responsibility (CSR) Awards-2024**. Like in the past, this year too NFEH has included some innovative categories to recognize participating organizations in this special area. Join us!
